### PRICE LIST FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, occasionally, when a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Price List approval process, the most current sheet number on file with the Commission is not always the sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a)
  - 2.1.1.A.1.(a)I.
  - 2.1.1.A.1.(a)I.
  - 2.1.1.A.1.(a)I.(1)
- D. **Check Sheets** - When a price list filing is made with the Commission, an updated Check Sheet accompanies the price list filing. The Check Sheet lists the sheets contained in the price list with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The price list user should refer to the latest Check Sheet to find if a particular sheet is the most current on file with the Commission.

2.10.2. Company may require any applicant or Customer to establish and maintain credit in one of the following ways:

- A. Demonstrating credit satisfactory to Company by providing information pertinent to the applicant's or Customer's credit standing;
- B. Providing a suitable guarantee in writing, in a form presubscribed by Company; or

###### **Hunting**

This feature will route a call to an idle line in a prearranged group when the called telephone number is busy. Typically this feature is used with the Customer's main telephone number and several telephone lines, so that the Customer may receive calls on several lines, although all calls are placed to the same number. This feature is often used on multi-line telephone sets or key systems.

Hunting **will** work on the same line as Call Forward Variable and Call Forward Don't Answer Features.

Hunting **will not** work on the same line as a Call Forward Busy Feature as they are essentially the same feature both are activated only when the line is busy.

Hunting **will not** work on the same line as Call Waiting.

1. Circular - Circular hunting hunts all lines in the hunting group regardless of the starting point.
2. Multi-Line - Feature allows all of Customer's line to reflect the same local telephone number and name for outbound Caller ID. - G. For Long Distance purposes, "On-Net" and "All Calls" are used to define Switched call types where Allstream is also the Customer's LEC. "Off Net" is used to describe Switched Long Distance service where Allstream is not the Customer's LEC.
