What is Washington Relay?

Washington Relay is a public service providing access to prompt, professional and precise communication through a telephone. Consumers of these specialized services, specifically individuals who are deaf, DeafBlind, hard of hearing or who are speech disabled, can communicate on the telephone via TTY, Voice Carry Over (VCO), Hearing Carry Over (HCO), Speech-to-Speech (STS), Spanish and Captioned Telephone. This helps ensure the ability to connect with family, friends or businesses with ease.

How does relay work?

Simply dial 711 or the toll-free number listed below to connect with Washington Relay. A qualified Relay Operator (RO) will ask for the area code and the number of the person you wish to contact before beginning to relay the call. Generally, the RO will voice the typed message from the text telephone (TTY) user to you. The RO will then relay your voiced response by typing it to the TTY user.

Captioned Telephone

Captioned Telephone is ideal for individuals that have experienced loss of hearing but are still able to speak for themselves. A captioned telephone works like any other telephone with one essential difference: it allows users to listen to their phone conversations while reading word-for-word captions on the screen. To call a Captioned Telephone user, dial: 711 or 877-243-2823.

How do I apply for specialized equipment?

The Washington Telecommunication Equipment Device program offers specialized equipment to eligible individuals in Washington who are deaf, DeafBlind or who are speech disabled. For more information you can visit: www.dshs.wa.gov/altsa/odhh/telecommunication-equipment-distribution or call 800-422-7930 (voice/TTY) or 360-339-7382 (VP).
